PEDIATRIC NEUROLOGY
Subject Index Volume 17

Aciduria, 3-methylglutaconic (3-MGC) type IV, and hepatic dysfunction, 353
ACTH, and cerebrospinal fluid nerve growth factor, and West syndrome, 224
Acupuncture and the opioid system, and management of migraine, 129
Adrenal insufficiency, caused by extra and central pontine myelinolysis, 158
AMPA glutamate and dopamine D_2 receptors, in hypoxic-ischemic basal ganglia necrosis, 139
Anhidrosis, and congenital insensitivity to pain, with mitochondrial and axonal abnormalities, 356
Arteriovenous malformation, cerebral, in three successive generations, 74
Arthrogryposis congenita, with complex I deficiency and ragged-red fibers, 249
Autism, and circulating autoantibodies to neuronal and glial filament proteins, 88
Autoantibodies, circulating, to neuronal and glial filament proteins in autism, 88
Axonal and mitochondrial abnormalities, with congenital insensitivity to pain and anhidrosis, 356

Basal ganglia necrosis, hypoxic-ischemic, and changes in AMPA glutamate and dopamine D_2 receptors, 139
Book reviews
  Advances in Neuro-oncology II: Paul L. Kornblith and Michael D. Walker/Editors
  Cerebral Venous Thrombosis: Marie-Germaine Bousser and Ralph Ross Russell/Authors
  On Call Neurology: Randolph S. Marshall and Stephan A. Mayer/Authors

Carbon monoxide poisoning, acute hydrocephalus following, 270
Cardiomyopathy, hypertrophic, myoadenylate deaminase deficiency, and gigantism syndrome, 61
Charcot-Marie-Tooth disease type 1A, de novo mutation of, 67
CNS insults, perinatal, and prognostic value of ^{1}H-MRS, 309
Complex I deficiency and ragged-red fibers, with arthrogryposis congenita, 249

De novo mutation of Charcot-Marie-Tooth disease type 1A, 67
Dopamine D_2 receptors and AMPA glutamate, changes in, and hypoxic-ischemic basal ganglia necrosis, 145
Down syndrome, and developmental immunohistochemistry of growth inhibitory factor, 134
Dysarthria, acquired childhood, 299
Dysplasia
  Cortical
    And Noonan syndrome, 266
    And rolandic epilepsy, 177
  Regional cortical, associated with suspected Hypomelanosis of Ito, 252

EEG measures, spectral, regional differences between healthy term and preterm infants, 218
Encephalomyopathy, mitochondrial, with 15915 mutation, 161
Encephalopathy
  Hypertensive, and malignant disease, 91
  With petechiae and ethylmalonic aciduria, 165
Endocrine function, assessment following severe head trauma, 339
Epilepsy
  Intractable, evaluation by neuroimaging, 19
  Lennox-Gastaut syndrome, 203
  Rolandic, and cortical dysplasia, 177
  Surgery, and neuroimaging, 111
Ethylmalonic aciduria, encephalopathy and petechiae, 165
Extra and central pontine myelinolysis with adrenal insufficiency, 158

Facial palsy, and Kawasaki syndrome, 362

Gigantism syndrome, myoadenylate deaminase deficiency, and hypertrophic cardiomyopathy, 61
Glioma, chiasmal, in neurofibromatosis type I with severe visual loss regained with radiation, 80
Growth inhibitory factor, developmental immunohistochemistry of, in normal brains and brains of patients with Down syndrome, 134
Guanidinoacetate methyltransferase deficiency, 155

Head trauma, severe, assessment of endocrine functions following, 339
Hemangiomatosis, central nervous sytem, 365
Hematoma, spontaneous epidural, as cause of sciatic pain, 350
Hemifacial spasm, benign congenital, 174
Hemimegalencephaly
  And bilateral neuropathologic changes, 344
  And hypomelanosis of Ito, 180
Hemorrhage, intraventricular, in preterm infants, and pregnancy-induced hypertension, 29
Hepatic dysfunction, and type IV 3-methylglutaconic (3-MGC) aciduria, 353
Huntington disease, 37
Hydrocephalus,
  Acute, following carbon monoxide poisoning, 270
  Posthemorrhagic, intraventricular urokinase as treatment for, 213
Hypertension, pregnancy-induced, and reduced intraventricular hemorrhage in preterm infants, 29
Hypomelanosis of Ito
  Associated with hemimegalencephaly, 180
  Suspected, and regional cortical dysplasia, 252

Infantile spasms, 224
Interleukin-1β levels in serum and cerebrospinal fluid of children with febrile seizures, 34
Ischemia, cerebral, echocardiographic sign for, 259
Ischemic cerebrovascular accident, with protein C and S deficiency, 319

Kawasaki syndrome, and facial palsy, 362

Lennox-Gastaut syndrome, 203
Leptomeningeal angiomatosis, enhanced MRI of, 262
Leukodystrophy, metachromatic, and recurrent seizures, 150

Leukomalacia, periventricular, and cerebral visual impairment, 331
Lupus erythematosus, cerebral, and SPECT, 44
Lymphoma, non-Hodgkins, and reversible MRI lesions due to pegaspargase treatment, 185

Medulloblastoma, recurrent, and chronic oral VP-16, 230
Meningitis, bacterial, and neurosurgical intervention, 144
Menkes disease, early neuroradiologic evidence of degeneration, 255
3-Methylglutaconic aciduria (type IV), and hepatic dysfunction, 353
Migraine
  Management with acupuncture and the opioid system, 129
  Ophthalmoplegic, enhancement of oculomotor nerve as diagnostic criterion for, 70
Mitochondrial and axonal abnormalities, with congenital insensitivity to pain, 356
Mitochondrial DNA, mutational analysis, in Rett syndrome, 327
Moyamoya disease and protein S deficiency, 171
MRI
  And substrates of epilepsy, 19
  Enhanced, of leptomeningeal angiomatosis, 262
  Lesions, reversible, due to pegaspargase treatment of non-Hodgkin's lymphoma, 185
Multiple sclerosis treated with plasmapheresis, 83
Myoadenylate deaminase deficiency, hypertrophic cardiomyopathy and gigantism syndrome, 61

Neuroimaging
  And epilepsy surgery, 111
  In the evaluation of intractable epilepsy, 19, 111
Neurofibromatosis type I, and chiasmal glioma with severe visual loss regained with radiation, 80
Neuropathologic changes, bilateral, and hemimegalencephaly, 344
Noonan syndrome, with cortical dysplasia, 266

Oculomotor nerve, enhancement of, a diagnostic criterion for ophthalmoplegic migraine?, 70
15915 mutation, and mitochondrial encephalomyopathy, 161
^{1}H-MRS, prognostic value in perinatal CNS insults, 309
Opioid system, and acupuncture in management of migraine, 129

Pain, congenital insensitivity to, with mitochondrial and axonal abnormalities, 356
Palsy, facial, and Kawasaki syndrome, 362
Pegaspargase treatment of non-Hodgkin's lymphoma, and reversible MRI lesions, 185
Pelizaeus-Merzbacher disease, and duplication of proteolipid protein gene as possible major cause, 125
Petechiae, encephalopathy, and ethylmalonic aciduria, 165
Plasmapheresis as treatment for multiple sclerosis, 83
Preterm twin infants <1,250 gm birth weight, neonatal neurologic characteristics, 322
Protein C and S deficiency, with ischemic cerebrovascular accident, 319
Protein S deficiency
  And moyamoya disease, 171
  And protein C deficiency, with ischemic cerebrovascular accident, 319
Proteolipid protein, early expression in human fetal and infantile cerebri, 235
Proteolipid protein gene, duplication of, a possible major cause of Pelizaeus-Merzbacher disease, 125
Pyridoxine, high-dose intravenous, in treatment of recurrent seizures, 54

Ragged-red fibers and complex I deficiency, with arthrogryposis congenita, 249
Rett syndrome, and mutational analysis of mitochondrial DNA, 327

Sciatic pain, caused by spontaneous epidural hematoma, 350
Sebaceous nevus syndrome, 77
Seizures
  Febrile, and interleukin-1β levels in serum and cerebrospinal fluid, 34
  Recurrent
    And treatment with high-dose intravenous pyridoxine, 54
    In metachromatic leukodystrophy, 150
SPECT, serial, with cerebral lupus erythematosus during acute exacerbation and after treatment, 44
Stiffman syndrome, sporadic, 58
Sturge-Weber syndrome, and enhanced MRI, 262

Tuberous sclerosis, and evidence of abnormal differentiation in giant cells of, 49

Urokinase, intraventricular, as treatment for posthemorrhagic hydrocephalus, 213

Very low birth weight infants, neurodevelopmental outcome, 240
Visual impairment, cerebral, and periventricular leukomalacia, 331
Visual loss, severe, and chiasmal glioma in neurofibromatosis type I, 80
VP-16, chronic oral, and recurrent medulloblastoma, 230

West syndrome, cerebrospinal fluid nerve growth factor and effect of ACTH, 224
